The WRX design flows from a hexagonal grille to the headlights, past slightly bulging fenders, ending with a swoopy rear window and trunk and stylish rear end with built-in spoiler. Compared to the 2021 WRX Limited, the 2022 version is 3.0 ins. The top of the screen shows the time, outside temperature and radio channel. The screen center provides access to all major commands, and the lower portion of the screen offers access to bilateral climate control features. Physical buttons on either side of the screen allow for individual temperature settings. The WRX dashboard and touchscreen are built for both looks and functionality. In addition to the high-tech HMI access to features, the WRX retains physical knobs and buttons for environmental controls, audio and more. Cruise and audio control settings are also available on the D-shaped steering wheel, which Subaru says is designed to make it easier to get in and out of the driver's seat. Glenn Sanders The bright and clear instrument cluster shows rpm, speed, oil temperature, tire pressure and gear. That gear indicator is handy when shifting among the six close-ratio manual speeds. The WRX touch display delivers a streamlined experience that takes very little time to learn and use, a welcome change to the tech overload often found in new vehicles. No wonder Subaru won one of the Wards 10 Best UX Awards in 2020. Glenn Sanders Interior and HMI The layout of the WRX interior is attractive while being functional, with few distractions, which is what you want when the focus is on performance and excitement. The Recaro seat is one of the most comfortable I have ever felt, even after a full day of driving. You can sit up straight, with shoulders back, not hunched over like most car seats force on you. Subaru engineers exploited the rigidity of the new platform to tune the suspension and steering, and mount the frame on thicker bushings, which definitely reduce road vibration and noise. (2.54 cm) plus long and carries a load of 19 pounds in more! I word that comes to mind when you think about how the WRX reacts over a wide range of revolutions. The direct injection DOHC turbocharged engine has the same maximum torque as 2.0L of the 2021 model, the power is slightly higher (3 hp), and this extra shift seems more reactive over a wider range, including under 2000 rpm. Subaru More photos in Gallery Subaru WRX 2022. Overall, there is it is surprising that the Subaru WRX is one of the most compact cars sold. And given the improvements to the 2022 model, I expect Subaru to grow its market, especially with the automatic transmission version. The weight of the brake (1,538 kg) and the close gearbox allow to accelerate with alacrity and zoom the gears even more! fast, now with significantly improved in the updated manual transmission. The available automatic transmission has also been improved to provide a faster and easier climb and descent. Glenn Sanders Subaru admits that part of the reason for switching to 2.4L was to align with the other 2.4L models in the range. The high and relatively low torque 3,390-lb. Power is transferred to the road via an 8.5-in AWD system (28 cm) HD touchscreen icons and menus are similar to a smartphone, making it easy to find the necessary functions, settings and commands. Based on the new Subaru Global Platform, the chassis, suspension, engine, transmission, steering, seats and bodywork are new and improved. The platform of this fifth-generation car has greater front-to-rear stiffness and torsional stiffness of 30%, which allows Subaru to slash more side shock absorption with a stiffer, more robust and durable body. The new platform is based on the updated 2022 Forester Outback Wilderness last month in Oregon. I would classify Subaru ADAS On par with the best systems I have met so far for the type or number of situations that can manage its reliability and control fluidity. Tires, with slightly broader wheels in the back compared to the front. Subaru has designed this to help WRX better take the road and the lower center of gravity offered by Subaru Global Platform, rigid plus, helps to reduce The roll in the sudden curves. Subaru has redesigned and built an almost entirely new sports car that takes the drive to the next level. The end result is a driving explosion, which reacts with enthusiasm to the controls of acceleration, braking and steering, while giving the sensation of having full control. The brand new WRX is driving home on motorways or city roads, but comes alive on winding roads here in the wine country. As prices (expect information on this month's prices). (8.6 kg), probably due to the larger 2.4L engine. Standard symmetrical integral traction for a tenacious Reengineered Track-Tuned suspension D-shaped suspension Aggressive steering wheel. Rally inspired Design born to perform VISTA MAINTENANCE FEATURES What are the differences between the Subaru Impreza WRX Sedan WRX Limited Sedan, WRX Premium Sedan and Sedan WRX? It is based on the advanced Subaru EyeSight technology with two front cameras and a wider range of driver assistance functions. New features include automatic emergency steering which works in combination with pre-collision braking at high speed, at 50 km/h (80 km/h). Subaru The 11.6-s.
